Re: **Addendum # 2**
2017 HOLGATE AND BEACH HAVEN BEACHFILL PROJECT
NJDEP DIVISION OF COASTAL ENGINEERING
PROJECT NUMBER 4288-17

This addendum is being issued to the contract for the advertisement of the 2017 Holgate and Beach Haven Beachfill Project, Township of Long Beach and Borough of Beach Haven, Ocean County, New Jersey as advertised on April 13, 2017.

The primary purpose of this Addendum is to update the following pages within the project specifications:

1. Project Description
 - a. Replace pages D-7 thru D-8 with pages D-7(A2-1) thru D-8(A2-3).
2. Standard Specifications
 - a. Replace pages S-9 thru S-11 with pages S-9(A2-4) thru S-11(A2-9).
 - b. Replace pages S-25 thru S-26 with pages S-25(A2-10) thru S-26(A2-12).
 - c. Replace pages S-28 thru S-29 with pages S-28(A2-13) thru S-29(A2-15).
3. Technical Specifications
 - a. Replace pages T-22 thru T-24 with pages T-22(A2-16) thru T-24(A2-18).
4. Proposal Sheet
 - a. Delete page P-2 within the Proposal, as those federal requirements are not applicable to this project.

Secondarily, the Division is currently consulting with the regulatory agencies to obtain the necessary permits to perform the work. Please be advised that the Division recently received notice from the National Marine Fisheries Service advising that **NO DREDGING SHALL COMMENCE IN THE BORROW AREA BETWEEN MARCH 1 AND SEPTEMBER 15** in order to, among other reasons, protect sandbar shark pupping and nursery habitat. The environmental windows when work can begin may be subject to change. It is the intent of the Division to issue a follow-up addendum once permits are obtained and extend the bid further to allow for

adjustments in bid prices due to the potential changes, as well as answer additional questions and expound upon existing concerns.

Also, please note the following clarification(s):

1. *Can Booster pumps be located within the contractor approved staging areas?*
 - a. **In conferring with the municipalities further it has been decided that the impact due to size and noise levels is not acceptable. Therefore, no booster pumps shall be permitted in the staging area OR on the beach.**

As a result of the changes contained within Addendum No. 2, please be advised that the Bid Date for this project **shall be extended to Wednesday, May 31, 2017 at 10:00 AM**. Except as amended in Addendum No. 2, all other terms and conditions of the Project Plans & Specifications remain the same.

Submit bids for this work with the understanding and full consideration of this addendum. The revisions declared in this addendum shall supersede the Specifications and Project Plans and are an essential part of the contract. Please note that a copy of this addendum and a signed copy of the attached "Acknowledgement of Receipt of Changes to Bid Document Form" must accompany your bid submission to be deemed complete. Failure to include this addendum and form in your bid package shall show cause for dismissal of said bid.

This addendum is being initially distributed to all current plan-holders via email with an official hard-copy to be sent via UPS. This addendum includes the following:

1. Cover Letter – (2 pgs.)
2. Revised Project Description Pages – (3 pgs.)
3. Revised Standard Specification Pages – (12 pgs.)
4. Revised Technical Specification Pages – (3 pgs.)

Please send verification of receipt of the addendum to Jenna Scott of this office via email to jenna.scott@dep.nj.gov. If you fail to receive all twenty (20) pages of this Addendum No. 2, please contact Jenna at (732) 255-0767.

Sincerely,

Erick Doyle, Supervising Engineer
Division of Coastal Engineering
